Jordan Rivera

jordan@example.com | (555) 010-0199 | Austin, TX | github.com/jordan-sample | linkedin.com/in/jordan-sample

Computer science student focused on reliable backend systems and thoughtful product engineering.

Education

Sample State University Aug 2023 – May 2027
B.S. Computer Science, Minor in Economics
Coursework: Data Structures, Operating Systems, Databases, Machine Learning

Experience

Software Engineering Intern May 2025 – Aug 2025
Example Logistics Co. Remote

- Built a TypeScript service that batches shipment status updates and retries failed webhooks
- Added integration tests and dashboards that made on-call debugging faster for the team
- Wrote a design document comparing queue options and presented the trade-offs to engineers

Undergraduate Research Assistant Jan 2025 – May 2025
Sample State Systems Lab Austin, TX

- Profiled storage workloads in Python and summarized results for a weekly research meeting
- Automated experiment setup with shell scripts, reducing manual configuration steps

Projects

Course Planner | Next.js, PostgreSQL

- Designed a schedule builder that checks prerequisites and section conflicts
- Deployed with automated migrations and end-to-end tests in CI

Transit Alerts Bot | Python, GTFS

- Parsed public transit feeds and sent delay notifications to subscribers

Skills

TypeScript | Python | Java | SQL | React | Node.js | PostgreSQL | Docker | Git
